

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (currently amended) A method comprising:

opening a document viewing application;

opening an original document in said document viewing application, said original document being in a file in memory;

displaying said original document;

including in the document viewing application at least one visual job ticketing plug-in providing a visual job ticketing interface; and within said document viewing application

inserting into the original document display a plurality of visual cue objects corresponding to print job ticketing parameters in said original document, said at least one visual job ticketing plug-in inserting said visual cue objects, the display indicating application of said print job ticketing parameters to said original document, [[:]]

inserting visual feedback into the file in memory, said at least one visual job ticketing plug-in inserting said visual feedback responsive to user interactions to amend said original document, said at least one visual job ticketing interface indicating changes by visual cue objects displayed, wherein including said changes in said file creates ~~creating~~ an amended document, [[:]]

removing said visual feedback from the amended document, said at least one visual job ticketing plug-in removing said visual feedback and making any corresponding changes to said print job ticketing parameters are included in a print job ticket for the amended document, said at least one visual job ticketing

plug-in removing said visual feedback responsive to performing [[the]] specific operations; and from said document viewing application forwarding said amended document and said print job ticket to a printer; and printing said amended document responsive to said print job ticket.

2. (currently amended) The method of claim 1 wherein the specific operation is a save operation from said document viewing application saving said amended document to storage for subsequent forwarding to print and said document viewing application provides access to all features while the plug-ins are active in said document viewing application.

3. (currently amended) The method of claim 1 wherein the specific operation is initiating a print from said document viewing application, said at least one visual job ticketing plug-in creating said print job ticket responsive to initiating.

4. (previously presented) The method of claim 1 wherein said step of inserting visual cue objects further includes said at least one visual job ticketing plug-in inserting a marker to each of the plurality of visual cue objects, each said marker not being displayed, and wherein said step of removing said visual feedback further includes said at least one visual job ticketing plug-in locating and removing markers in said file.

5. (previously presented) The method of claim 1 wherein said step of inserting visual feedback cue objects further includes said at least one visual job ticketing plug-in maintaining a list of markers to each of the plurality of visual cue objects inserted in said file and wherein said step of removing said visual feedback further includes said at least one visual job ticketing plug-in referencing the list and identifying the markers to the plurality of visual cue objects to be removed from said file.

6. (currently amended) The method of claim 1 wherein said at least one visual job ticketing plug-in is a set of visual job ticketing plug-ins, said document viewing application is a document editor, said visual feedback includes feedback for document edits, said set of visual job ticketing plug-ins create said print job ticket when [[the]] markers are removed.

7. (previously presented) The method of claim 6 wherein the set of visual job ticketing plug-ins are further effective in performing the step of:

applying certain of the print job ticketing parameters to all pages of the document file responsive to said interactions.

8. (previously presented) The method of claim 6 wherein the set of visual job ticketing plug-ins are further effective in performing the step of:

applying certain of the print job ticketing parameters to selected pages of the document file responsive to said interactions.

9. (currently amended) A program product comprising:

a non-transitory computer readable medium; and

program instructions on said medium which, when executing on a processor with a document viewing application active, are effective to:

include in the document viewing application at least one visual job ticketing plug-in providing a visual job ticketing interface

open an original document in said document viewing application, said original document being in a file in memory;

display said original document; and within said document viewing application

insert into the original document display a plurality of visual cue objects corresponding to print job ticketing parameters in said original document, said at least one visual job ticketing plug-in inserting said

visual cue objects, the display indicating application of said print job ticketing parameters to said original document, [[:]]

monitor user interactions with said document viewing application by said at least one visual job ticketing plug-in, [[:]]

insert visual feedback into the file in memory by said at least one visual job ticketing plug-in responsive to said user interactions to amend said original document, said at least one visual job ticketing interface indicating said user interactions by changes to visual cue objects displayed, wherein including said changes in said file creates ~~creating~~ an amended document, [[:]]

remove said visual feedback from the amended document by said at least one visual job ticketing plug-in, said at least one visual job ticketing plug-in making any corresponding changes to said print job ticketing parameters, [[:]]

include said print job ticketing parameters in a print job ticket by said at least one visual job ticketing plug-in responsive to performing specific operations; and

forward said amended document and said print job ticket to a printer for printing said amended document responsive to said print job ticket.

10. (previously presented) The product of claim 9 wherein the specific operation is a save operation saving said amended document to storage for subsequent forwarding to print.

11. (previously presented) The product of claim 9 wherein the specific operation is initiating a print, said at least one visual job ticketing plug-in creating said print job ticket responsive to initiating.

12. (previously presented) The product of claim 9 wherein said insertion of visual cue objects further includes said at least one visual job ticketing plug-in inserting into said

file a marker to each of the plurality of visual cue objects, each said marker not being displayed, and wherein said removal of said visual feedback further includes said at least one visual job ticketing plug-in locating and removing markers in said file.

13. (previously presented) The product of claim 9 wherein said insertion of visual cue objects further includes said at least one visual job ticketing plug-in maintaining a list of markers to each of the plurality of visual cue objects inserted in said file and wherein said removal of said visual feedback further includes said at least one visual job ticketing plug-in referencing the list and identifying the markers to the plurality of visual cue objects to be removed from said file.

14. (currently amended) The product of claim 9 wherein said at least one visual job ticketing plug-in is a set of visual job ticketing plug-ins, said document viewing application is a document editor, said visual feedback includes feedback for document edits, said set of visual job ticketing plug-ins creating said print job ticket when [[the]] markers are removed.

15. (previously presented) The product of claim 14 wherein the set of visual job ticketing plug-ins are further effective to apply certain of the print job ticketing parameters to all pages of the document file responsive to said interactions.

16. (previously presented) The product of claim 14 wherein the set of visual job ticketing plug-ins are further effective to apply certain of the print job ticketing parameters to selected pages of the document file responsive to said interactions.

17. (currently amended) A method as in claim 1, wherein said document viewing application is a word processor and said step of inserting visual cue objects further includes displaying the plurality of visual cue objects in thumbnails.

18. (previously presented) A method as in claim 6, wherein said step of inserting visual cue objects further includes displaying the plurality of visual cue objects in thumbnails, said plug-in further monitoring said thumbnails for current page selection.

19. (previously presented) A program product as in claim 9, further comprising program instructions that cause the processor to display the plurality of visual cue objects in thumbnails.

20. (previously presented) A program product as in claim 19 further comprising program instructions that cause the processor to display the plurality of visual cue objects in thumbnails, said plug-in further monitoring said thumbnails for current page selection.
